

Brand	Generic	Location	Use
Dormosedan	detomidine	cabinet	non-narcotic sedative and analgesic that can be used in horses for a variety of minor surgical and diagnostic procedures
Equi-Bute paste	phenylbutazone		non-steroidal anti-inflammatory drug used for relieving pain or reducing fevers
Equidone gel	domperidone		prevention of fescue toxicosis (a warm season condition characterized by reduced feed intake and weight gains or milk production) in pregnant mares
Epsom Salt Poultice	epsom salt		for abscesses (helps to dry out pus and cause boils to drain)
Equioxx	firocoxib		controls pain and inflammation associated with osteoarthritis for up to 24 hours with each dose.
Gentamax	gentamicin		treatment of infections of the lower respiratory tract in horses caused by aerobic Gram-negative bacteria; recommended for the control of bacterial infections of the uterus (metritis) in horses
KetoMed	ketoprofen		recommended for the alleviation of inflammation and pain associated with musculoskeletal disorders in horses
Oxytocin	oxytocin		causes uterine contraction for the treatment of a retained placenta and the emptying of uterine fluid accumulations, which is helpful for post-breeding uterine inflammation. Oxytocin has also been found effective at keeping mares out of heat for prolonged periods.

Phenylbute Powder	phenylbutazone		anti-inflammatory agent that is indicated for the relief of inflammatory conditions associated with the musculoskeletal system in horses, not approved for cattle
Pributazone bolus	phenylbutazone		relief of inflammatory conditions associated with the musculoskeletal system in horses only
Prom-Ace	acepromazine	cabinet	a sedative/tranquilizer used as a pre-anesthetic and for chemical restraint in dogs and cats
Regu-Mate	altrenogest		to suppress estrus in mares. Suppression of estrus allows for a predictable occurrence of estrus following drug withdrawal
Rompun	xylazine		Equine sedative and analgesic as well as muscle relaxant
Uniprim	sulfadiazine/trimethoprim		control of bacterial infections during treatment of acute strangles, respiratory tract infections, acute urogenital infections, wound infections, and abscesses
Vetameg paste	flunixin		recommended for the alleviation of inflammation and pain associated with musculoskeletal disorders in the horse, and visceral pain associated with colic
Ventipulmin	clenbuterol	cabinet	open the respiratory passages of horses and to help clear them of mucus. This can be beneficial in some allergic respiratory diseases, often associated with a cough, due to mould spores in hay and straw (chronic obstructive pulmonary disease or COPD)
